IN THE U.S.

for students with degrees in
agri-business, energy, business,
engineering, and biosciences

The MidAmerica CropLife Association connects with Young Leaders in agriculture to ensure that the mission and needs of the industry will be met long into the future. Providing our member companies with a well-educated voice and a clear path toward the continued success of American agriculture.

The MACA Young Leader Scholarship program offers college students the opportunity to connect with the crop protection industry and explore the many and diverse future career opportunities in the business of agriculture. And from what we've seen in the Young Leaders who have earned a MACA scholarship, the future is in excellent hands...

LEARN MORE ABOUT THE MEMBER COMPANIES OF MACA, YOUNG LEADER SCHOLARSHIPS AND YOUR CONNECTIONS TO AGRICULTURE. VISIT US ONLINE AT WWW.MACA.ORG TODAY!

Thanks to our member companies' commitment to modern agriculture, MACA is playing a major role in feeding the world and fueling the economy... from ground level to a global scale.

The Mid America CropLife Association will continue to help keep farmers farming and American agriculture growing.

American Midwest

Feeding the World and Fueling the Economy

The Mid-America CropLife Association (MACA) is proud to be working side by side with America's farmers. Through innovation, stewardship and modern agricultural inputs the crop production and protection companies that make up MACA's membership help keep farmers farming and American agriculture growing: Responsibly, Sustainably and Abundantly.

American Agriculture is Family Business

Nearly 97% of America's Farms are Family-Owned. Those family farms not only feed, clothe and fuel our needs, agriculture produces millions of jobs, from work that is directly related to agriculture — as well as jobs in many other sectors of the economy that rely on agricultural goods for ingredients and materials...

No matter where we live, what we do — we are more directly connected to farming than you ever imagined.

FARMERS &
AG BUSINESS
ACCOUNT FOR **\$800**
\$800 BILLION IN GDP

Grains, meat, dairy and other raw goods create jobs for more than 24 million Americans and account for \$800 billion dollars in gross domestic product.

Connected to Agriculture on a Global Level

The Mid America CropLife Association connects farmers to crop production technologies and information that helps make American agriculture one of the greatest success stories growing.

1 AMERICAN FARMER
FEED AN AVERAGE OF 155 PEOPLE PER DAY

Crop production serves as the world's ultimate renewable resource for food, feed, fiber and fuel. And Crop Protection is an extremely critical component to successful, sustainable crop production

Member companies of MACA annually invest billions of dollars in research and development. That investment yields tremendous advances in biotech, genetics and chemistry, which helps America's farmers produce more than ever before from every acre they plant — while actually reducing inputs.

13 MIDWESTERN STATES PRODUCE
more than **60%**
of U.S. agricultural exports
